AltiTouch™ 500

Delivering Value and Functionality

AltiTouch™ 500 telephones offer a superior feature set at an affordable price. The AltiTouch 500 telephone is an executive level speaker-display analog telephone, specifically engineered for the AltiServ IP-PBX to provide high functionality at an affordable price. The AltiTouch 500 telephone is equipped with a high quality speakerphone and an ultra large font, backlit display with adjustable viewing angle. This high function telephone has standard cost saving and productivity features that include a built in analog data port and a RJ-22 amplified headset jack.

Make calling easy with the AltiTouch 500 telephone. The AltiTouch 500 makes call handling and voice mail management easy by eliminating the need to memorize feature codes. Using the speaker or the amplified headset jack, telephone users simply press the one-touch feature keys for easy handset, hands free, headset or intercom calling. One-touch buttons for other common functions make this telephone very simple to use. Preset feature keys help you set up conference calls and transfer callers with confidence. The AltiTouch 500 has additional programmable one-touch feature buttons available to provide custom features for individual users. Users can save up to 99 speed dial names and numbers in a personal directory for fast, easy dialing. You can also pre-dial to place calls without lifting the receiver and even backspace for digit dialing errors.

Maximize your investment. This high quality business set is amazingly affordable. By choosing the AltiTouch 500 telephones, you can maximize your investment and offer executive level telephone features and capabilities to every user.

Make calling easy with affordable, large screen AltiTouch 500 executive telephones.
